WORK EXPERIENCE

Apptio

Bangalore

Software Development Engineer - 1

Apr 2022 - Present

- Working and contributing as a key member on enhancing & creating the features of Application which is used by the Customers of Apptio.
- Wrote Functional & Unit Test Cases and, ensured proper code coverage covering all the test conditions.
- Involved in designing and developing a robust solution to enhance the functionality, scalability, and performance of the customer requirements.

Mindtree

Bangalore

Software Engineer

Dec 2020 - Apr 2022

- Worked as a part of Product Development Team in developing a web application for the daily activities of the Mindtree employees.
- Involved in requirement analysis and planning with UI/UX Designers and Architects for the new feature's implementation.
- Created the Web Application with completely new UI given by UI/UX Team using **HTML, CSS, JavaScript** and **Angular Material**.
- Designed and developed multiple industry level **RESTful APIs** to support different functionality using **Spring Boot**, and Integrated into UI using **Angular**.
- Enhanced the performance by reducing the number of API calls by around 10% - 15% response time.
- Designed and developed many generic services and UI components in **Angular** to improve the productivity of the team.
- Created the Dashboard using **D3 JS** Graphs & various UI components.
- Created the Interactive & Beautiful **Animated D3 JS** Charts like Line, Multiline, Stacked Bar, Nested Bar, Grouped Bar, Waterfall charts, etc with filter functionality to visualize the complex data.
- Implemented the complex Table as per the **UX** design with complex filter functionality for an application.
- Implemented the APIs for getting the authenticated URL with **JWT Token** for the redirection of apps using **Spring Security**.
- Worked along with the testers constantly to analyse the bugs and fixed them on a priority to ensure the delivery without any issues.
- Quick fixes given to tickets raised by the QA team.
- Experienced working in a fast-paced environment and build applications from scratch.

AWARDS / ACHIEVEMENTS

- Participated in an internal Hackathon at Apptio and won the **Sunny's Choice** Award.
- Received **SPOTON** Award in Mindtree for consistent performance and for completing the Project successfully with good satisfaction.
- Received **CREST** Award in Mindtree for successfully delivering the Project.
- Solved 500+ problems on LeetCode/GeeksforGeeks.
